

CLM-10331

5/8

A technical drawing of a key. The drawing shows the profile of the key with various chamfers and a central groove. On the left side, there are two horizontal lines with vertical tick marks extending outwards, defining a height dimension labeled '5/8'. At the bottom, there are two horizontal lines with vertical tick marks extending outwards, defining a length dimension labeled '2-19/32'. The key's profile starts with a rounded top-left corner, followed by a flat top surface that tapers down to a lower level. This lower level has a small step down, then a slight rise, and finally a rounded top-right corner. The bottom of the key is mostly flat, with a small chamfered section in the middle.

2-19/32
