

CLM-18142

$\frac{11}{16}$

A technical drawing of a cloud-shaped object. The object has a horizontal base and a rounded top. The top edge is a smooth curve that rises to a central peak and then descends to meet the base. The drawing includes dimension lines: a vertical line on the left indicates a height of 11/16, and a horizontal line at the bottom indicates a width of 1 1/4. The dimension lines are drawn with thin lines and have short perpendicular tick marks at the ends. The object itself is drawn with a thicker line.

$1\frac{1}{4}$
